NUCLEONICS INDEX to VOLUME 20, January–December, 1962

About the Index

As you will see from scanning it, there are about 75 headings in this year's index. This is a slight reduction in number and makes each of our headings somewhat more general. This means, for example, that if you want to find an article in the health physics area, specifically about contamination or decontamination, then you should look under health physics (the general category) rather than the more detailed heading.

Many organizations, for example, the Atomic Energy Commission, are indexed individually. However company names can be found under the heading "Companies." Likewise under "Countries" you will find articles about West Germany, the UK, etc.

Abbreviations used in the index refer to NUCLEONICS editorial departments as follows: **AR**, Applied Radiation; **HP**, Health Physics; **IM**, Instrumentation and Measurements; **News**, NUCLEONICS News of the Month; **NR**, Nuclear Reactions (letters); **NB**, Nuclear Bookshelf; **NE**, Nuclear Engineering; **RN**, Russian Nucleonics; **TH**, Thermonucleonics.

Because of publication deadlines, the December "News of the Month" has not been indexed.

Since the character of news makes the chronology of events important, NUCLEONICS News of the Month entries in the index are arranged chronologically and listed together at the end of each index group; they are identified by "News." All other entries are arranged alphabetically.

SUBJECT INDEX

A

Accelerators
Van de Graaff for Particle Physics (AR)....Jul 82
Versatile Accelerator Facility for Research at RPI (AR) V. L. Parsegian....Oct 104
Stanford Linac construction begins (News)..Jan 23
